Cidepe<sup>®</sup>

Industrial Center for Teaching and Research Equipment

# Kit for phase transition with sensors and software EQ821

## Function

Studying changes of state for liquids and solids. Identifying and describing solidification and liquefaction. Generating charts for temperature vs time using data collected during phase changes. Generating charts related to changes in the physical state of water.

• Set for use monitored through a computer connected to the CipedeLab interface.

## **Knowledge** areas

Physics - Chemistry

## Level

Graduation - Technical education - High school
