

Absolute pressure sensor, 20 to 250 kPa, miniDIN

CL012B

Function

It is intended to measure static and dynamic pressure in closed containers. Atmospheric pressure (Low vacuum).

Range of operation: 20 to 250 kPa;

Resolution: 0.25 kPa;

- Metal fixture provides stability;
- Robust, with aluminum and stainless steel cabinet;
- It works with software and data acquisition interface CidepeLab.
