

Renewable energy kit, hydroelectric with consumer unit and interface.

## **Function**

Intended for the study of hydroelectric energy, generation of electric energy through a hydrogenerator, voltage in the three-phase system, flow, fall available and gross power of a hydroelectric plant, relation between frequency and rotation of the Pelton turbine, voltages in in the three-phase system, phase-phase and phase-neutral, etc.

## **Knowledge areas**

Math & Science Fundamentals - Metrology

## Level

Graduation - Technical education
