

Kit for solar energy, with consumer unit.

EQ208G

Function

Intended for experimental study, laboratory and conducting experiments about: solar energy, generation of solar energy into electricity, performance of a photovoltaic panel, advantages of using the energy accumulator, conversion of light into electrical energy, conversion of electrical energy into mechanics, characteristic curve of a photovoltaic panel, energy consumption, etc.

Knowledge areas

Physics - Math & Science Fundamentals - Metrology

Level

Graduation - Technical education - High school - Elementary school
