

Set building a simple circuit, electric bell and telegraph

SCN-F006K

Function

Intended for experimental study, physics laboratory, natural sciences, carrying out physics experiments, natural sciences, on: Electromagnetism. A simple telegraph circuit. The telegraph. The transmission, the sending of the signal that carries the message. Signal reception. The message log. The simple electrical circuit and its components. A simple circuit with an electric bell. The operation of the electric bell. The simple electrical circuit and its components, etc.

Note: Batteries are not included.

Knowledge areas

Physics - Compact Kits

Level

High school - Elementary school
