

Hydrostatic panel, fluids

EQ033

Function

Intended for experimental study, physics laboratory and carrying out physics experiments on: Hydrostatics. The pressure at a point in a liquid at equilibrium, Stevins principle. Measuring pressure on an open tube manometer. Stevins principle, the fundamental principle of hydrostatics. Pascals principle.

Baise Pascal and the principle that bears his name. Calculation of gauge pressure. Pressure measurement in mmH₂O indicated by the open-tube manometer. Converting mmH₂O pressure units to Pa and N/m². An important application of Pascals principle, the hydraulic press, etc.
